

DETAILS:

L4000 AUTOMATIC FIN FORMERS

Description:

L4000 Automatic Fin Formers allows the finning on copper pipe, aluminum, cupronichel.

This machining, obtained by elastic failure set, has mechanical function of increase the surface area of tube heat exchange.

Fin depth and pitch are programmable through the operator panel. The complete system consists in Coiler, finner and dischanger.

Technical details:

- Cutting range: from D. 6 to D.22 mm.

- Lengths: from 200 mm to 6000 mm.
- Kind of materials: Copper, aluminum, cupronichel .
-

The data above refer to standard machine.

Any customization can be engineered and implemented case by case.

TECHNICAL DETAILS:	
Max. lenght	6.000 mm
max.thickness	22mm
min.thickness	6mm
