

DETAILS:

CNC POSITIONERS

Description:

Positioner truck for welding system or plasma cutting.

These trucks are able, through movements and programmable interpolation, to perform rotations and advancements in order to allow weldings or cuttings of the cylindrical pieces supported above.

Technical details:

- min. Pipes diameter position: 300 mm.
- max. Pipes diameter position: 2000 mm.
- min. lenght: da 2000 mm.
- max. lenght: da 20.000 mm.
- max weight on each truck: 25.000 Kg.
- max movement speed 10m/min

Any customization can be engined and implemented case by case on request.

TECHNICAL DETAILS:

Min. Pipes lenght	2.000 mm
Max. Pipes lenght	20.000mm
Max weight on each truck	25.000 kg.
